REAPER RIG ACCESSORY PLATE

The Reaper Rig Accessory Plate is an adapter plate designed to accommodate mounting of a camera, spotting scope, flashlight, rangefinder or other accessory adjacent to the KJI Reaper Grip or Reaper Rail. When used in conjunction with a camera ball head or our Leveling Head accessory, the Reaper Rig will co-witness your camera or spotting scope with the optics on your rifle, eliminating the need for an extra tripod.

MOUNTING

The KJI Reaper Rig Accessory Plate mounts directly to your Reaper Grip or Reaper Rail and includes a captive 1/4-20" threaded mounting stud. The Reaper Rig features three mounting locations perfectly suited for top or bottom installation of Picatinny rail sections, including the Magpul MOE 2.5", for truly versatile accessory attachment. The Rig also includes two slots to hang a lanyard of calls, remote, or any other tethered accessories.

To mount:

1. Locate the three threaded screw inserts on your Reaper Grip/Rail.
2. Align your Reaper Rig attachment holes over the Reaper Grip/Rail holes.
3. Install the included screws through the Reaper Rig and Reaper Grip/Rail plate and tighten.
4. Once fastened, mount your accessories as desired.

MOUNTING ACCESSORIES

1. Locate the Reaper Rig's 1/4-20" threaded stud.
2. Thread your camera or spotting scope onto the Reaper Rig mounting stud and tighten.

WARNING

Before handling the Reaper Rig, read and understand the contents of your Reaper Grip/Rail manual as well as the Reaper Rig manual.

- Do not exceed the tripod's maximum load capacity. (see your tripod's manual)
- Ensure the Reaper Rig is securely fastened.
- Always remove accessories when transporting.

MAINTENANCE

Before, after, and during normal operation, it is suggested that you routinely check all of your connection points and ensure all screws are still firmly set in the proper place.
