Arnsberg, March 2016

A world first: the Walther KK500

The new KK500 is a significant high-end extension of Walther's KK300 range of small-bore rifles. With its special technical features, high shooting precision, new trigger and ergonomic stock it is designed primarily for shooters who compete at the national and international level.

WALTHER KK500:

- **World first, protected by patent: bolt handle and cartridge ejection can be switched without tools for right- or left-handed operation**
- **Many exclusive technical features:**
 - Bolt and breech positioned far back in the receiver
 - Ignition at the bottom of the cartridge rim
 - Optimum cocking cam, smooth bolt handling
 - Ball-bearing-mounted match trigger
 - High-precision match barrel made of alloy steel ... and much more
- **Developed in collaboration with top shooters**
- **Choice of Alutec or advanced Anatomic stock**
- **Choice of mechanical or electronic trigger**
